CHI SIAMO

Mister Shut con sede in Modugno (BA), dal 1987 opera nel settore della produzione di porte blindate. Alla base della politica aziendale c'è l'impegno e l'entusiasmo di persone che hanno saputo trasformare una piccola impresa in un'azienda leader del settore. "L'innovazione come principale strumento di differenziazione" Per *Mister Shut*, questa riflessione si traduce in una continua ricerca di soluzioni e varianti in grado di offrire ai propri clienti risposte concrete a qualsiasi esigenza in un mercato in costante evoluzione. La tecnologia, i progetti, la forza lavoro e l'impegno comune che caratterizzano il ciclo produttivo sono in grado di garantire un elevato standard qualitativo e di sicurezza senza sottovalutare il valore della personalizzazione estetica e prestazionale del prodotto, interamente Made in Italy.

COLLABORAZIONI

Mister Shut ha voluto intraprendere, sin dai primi anni, un percorso all'avanguardia fondato sul principio di ricerca continua di materiali, tecnologie e design compatibilmente ai vincoli imposti dagli standard prestazionali delle normative vigenti in termini di anti-intrusione e antieffrazione. Questa particolare attenzione verso il prodotto ha dato vita a molteplici e importanti collaborazioni nazionali ed internazionali per ridefinire il design dei prodotti e spingerli oltre le tendenze più attuali, collaborando con famosi architetti e frequentando fiere di settore siamo sempre rivolti ad essere pionieri nel settore. Tra le più rilevanti, menzioniamo quella con l'Architetto A. Castiglioni autore del progetto "Touch": uno studio mirato alla creazione di prodotti innovativi e dal design ricercato.

MISSION

"La porta ideale è il connubio perfetto tra sicurezza, funzionalità ed eleganza". *Mister Shut* rispetta da oltre 30 anni questi principi per realizzare la porta blindata perfetta, adatta a qualsiasi tipo di esigenza di ambiente e di stile. *Mister Shut* ha ampliato il concetto di porta di sicurezza, trasformando un elemento esclusivamente funzionale in un complemento d'arredo. La porta *Mister Shut* non è più un prodotto che semplicemente separa gli ambienti ma un prodotto che si distingue come icona di stile e personalità e che riesce a inserirsi in qualsiasi contesto. Tutto questo è reso possibile grazie ad un personale altamente flessibile e specializzato, dal supporto di sistemi informatici e tecnologia avanzata.

LA PORTA PERFETTA

Mister Shut affianca alla sicurezza, la massima flessibilità di progetto e di realizzazione. Ogni porta blindata viene progettata e realizzata su misura: struttura, rivestimenti, accessori vengono selezionati compatibilmente al contesto nel quale sarà inserita la porta. L'esperienza e la flessibilità dell'azienda permettono di spaziare partendo da progetti di portoncini blindati standard per ristrutturazioni o per cantieri fino a raggiungere dei veri e propri progetti ad hoc e soluzioni di installazione su misura, gestendo e superando vincoli e limiti di spazio, di progettazione e di posizionamento al fine di soddisfare qualsiasi esigenza del cliente.

PERCHÉ SCEGLIERE *MISTERSHUT*

Internazionale per visione e made in Italy per design, ogni progetto *Mister Shut* integra qualità ed esigenze progettuali armonizzandosi perfettamente in tutte le case e nei grandi progetti a livello internazionale. La sua trentennale esperienza oggi si esprime in una eccezionale flessibilità produttiva: una grande collezione di portoncini dal design italiano e una capacità di rispondere a ogni specifica esigenza grazie a una completa passione e dedizione in ogni fase operativa. Con *Mister Shut* ogni porta diventa perfetta per il tuo progetto.

WE ARE *MISTER SHUT*

Mister Shut based in Modugno (BA), has been operating in the armored door production sector since 1987. The company policy is based on the commitment and enthusiasm of people who have been able to transform a small business into a leading company in the sector. "Innovation as the main differentiation tool". For *Mister Shut*, this reflection translates into a continuous search for solutions and variants able to offer its customers concrete answers to any need in a constantly evolving market. The technology, projects, workforce and common commitment that characterize the production cycle are able to guarantee a high standard of quality and safety without underestimating the value of the aesthetic and performance customization of the product, entirely Made in Italy.

COLLABORATIONS

Mister Shut wanted to undertake, from the earliest years, an avant-garde path based on the principle of continuous research of materials, technologies and design compatibly with the constraints imposed by the performance standards of the regulations in force in terms of anti-intrusion and anti-burglary. This particular attention to the product has given

rise to multiple and important national and international collaborations to redefine the design of products and push them beyond the most current trends, collaborating with famous architects and attending trade fairs we are always aimed at being pioneers in the sector. Among the most important, we mention the one with the architect A. Castiglioni, author of the “Touch” project: a study aimed at creating innovative products with a refined design.

MISSION

“The ideal door is the perfect combination of safety, functionality and elegance”. *Mister Shut* has been respecting these principles for over 30 years to create the perfect security door, suitable for any type of environment and style requirement. *Mister Shut* has expanded the concept of safety door, transforming an exclusively functional element into a piece of furniture. The *Mister Shut* door is no longer a product that simply separates rooms but a product that stands out as an icon of style and personality and that manages to fit into any context. All this is made possible thanks to a highly flexible and specialized staff, the support of information systems and advanced technology and the collaboration with national and international figures.

THE PERFECT DOOR

Mister Shut combines safety with maximum project and implementation flexibility. Each door is designed and made to measure: structure, coverings, accessories are compatible with the context in which the door will be inserted. The experience and flexibility of the company can range from projects of armored doors for renovations or construction sites up to real ad hoc projects and installation solutions, managing and overcoming constraints and space limits, design and positioning in order to satisfy any customer need.

WHY YOU SHOULD CHOOSE MISTERSHUT

International for vision and made in Italy for design, each *Mister Shut* project integrates quality and design requirements harmonizing perfectly in all homes and in large international projects. Its thirty years of experience today is expressed in an exceptional production flexibility: a large collection of doors with an Italian design and an ability to respond to every specific need thanks to complete passion and dedication in every operational phase. With *Mister Shut* every door becomes perfect for your project.

designer

Adriano Castiglioni

L'esperienza nel settore del design è iniziata nei primi anni ottanta, prima ancora del conseguimento della Laurea in Architettura presso il *Politecnico* di Milano avvenuta nel 1991. Negli anni si sono succedute diverse esperienze e collaborazioni di lavoro con svariati marchi del settore del mobile oltre a progetti architettonici in Italia e all'estero. La collaborazione professionale con *Mister Shut* è iniziata nel 2012 per la progettazione di porte di sicurezza dal design contemporaneo.

The experience in the design sector began in the early eighties, even before graduating in Architecture at the *Politecnico* di Milano in 1991. Over the years there have been several experiences and collaborations with various brands in the furniture industry as well as architectural projects in Italy and abroad. The professional collaboration with *Mister Shut* began in 2012 for the design of security doors with a contemporary design.

covers

Finiture sofisticate e una ampia gamma di materiali per offrire un elevato grado di personalizzazioni.

Sophisticated finishes and a wide range of materials to provide a high degree of customization.

guida alle esposizioni - installazione consigliate

I rivestimenti solo per interni:

Linee: Laminati, Impiallacciati, MDF, Linea Inserti, Linea Incisi, Linea Future Generation, New Generation, Linea Glass.

Essenze/Tinte solo per interno: Rovere Spessart, Frassino, Laccati Velvet.

Sono adatti per il lato interno del portoncino o per il lato esterno nel caso di esposizioni totalmente protette e non a contatto con agenti atmosferici.

I Rivestimenti con esposizione "Limitata"

Linee: MDF Idrofugo, Linea Massello, Impiallacciati in essenza sp. 15,5 mm, Linea Future Generation (con indicazione per esposizione esterna), Linea Louvre (con indicazione per esposizione esterna), Linea New Generation (con indicazione per esterno) Linea Louvre con abbinamento Legno, Metallo.

Possono essere esposti all'esterno purchè non a contatto diretto con gli agenti atmosferici. La tenuta e durata del rivestimento è vincolata ad una corretta pulizia/manutenzione del prodotto.

In caso di manutenzione/pulizia frequente ed in situazioni di esposizioni non aggressive (contatto diretto con agenti atmosferici in fasce light) è valutabile l'installazione in ambienti non riparati. In caso di rivestimenti in legno i prodotti vengono realizzati utilizzando i materiali migliori (tranciati di essenze legnose). Essendo il legno materia viva e mutevole, il colore del rivestimento può essere soggetto a leggera variazione.

La variazione non pregiudica le caratteristiche del legno nè l'azione di protezione della verniciatura.

I Rivestimenti per "esterni"

Linee: Pannelli in Okomè, Teak, Linea Metalli, Linea Alluminio stampato, Linea Ceramica, Linea PVC.

Comprendono rivestimenti realizzati con materiali tecnici performanti, altamente indicati in caso di esposizioni aggressive che garantiscono tenuta e durata al prodotto.

exhibition guide - recommended installation

Coatings for interiors only:

Lines: Laminates, Veneered, MDF, Inserts Line, Engraved Line, Future Generation Line, New Generation, Glass Line.

Wood finishes/Colours for internal use only: Spessart Oak, Ash, Velvet lacquered.

They are suitable for the internal side of the door or for the external side in the case of totally protected exposures and not in contact with atmospheric agents.

Coatings with "Limited" exposure

Lines: Water-repellent MDF, Massello line, Veneered wood th. 15.5 mm, Future Generation Line (indicated for outdoor exposure), Louvre Line (indicated for outdoor exposure), New Generation Line (indicated for outdoor exposure) Louvre Line combined with Wood, Metal.

They can be exposed outdoors as long as they are not in direct contact with the weather. The tightness and duration of the coating depends on correct cleaning/maintenance of the product.

In the event of frequent maintenance/cleaning and in situations of non-aggressive exposure (direct contact with atmospheric agents in light bands), installation in non-sheltered environments can be evaluated. In the case of wooden cladding, the products are made using the best materials (sliced wood essences). Since wood is a living and changing material, the color of the covering may be subject to slight variations.

The variation does not affect the characteristics of the wood nor the paint protection action.

Coatings for "exteriors"

Lines: Panels in Okomè, Teak, Metal Line, Aluminum Line printed, Ceramic Line, PVC Line.

They include coatings made with high-performance technical materials, highly indicated in the event of aggressive exposures that guarantee tightness and durability of the product.

*ATTENZIONE

Per ottenere le proporzioni di svetratura come da immagine di riferimento, deve essere utilizzata la serratura ridotta a chiavistelli con boccatura a 48mm.

Qualora si preferiscano altre tipologie di serratura, è necessario verificare la fattibilità del progetto e riproporzionare il disegno del pannello e le relative dimensioni del vetro.
